### Environment protection fee:

### Consumption of electricity:

#### Berths without consumption counter

Regardless of whether the boat is moored on monthly or annual bases, for all boats up to 15m a standard consumption of electricity is

included in price in all ACI marinas. For the boats of length higher than 15m electricity consumption will be charged by a flat rate of 10% on the annual or monthly berth rental.

For the boats on a daily berth and of the length higher than 8,01m, power consumption fee is as follows (except ACI Marina Žut and ACI Marina Piškera where a special price lists are effective):

- from 8,01 – 10 m . . . . . 2 EUR
- from 10,01 – 12 m . . . . . 5 EUR

- from 40,01 – 50 m . . . . . 55 EUR
- from 50,01 – 60 m . . . . . 75 EUR

### Berths with the consumption counter

On berths with consumption counter the consumption is charged by the price list that is the integral part of the marina that offers such a service.

### Consumption of water:

Water consumption for water tank filling over 200 litres is charged extra by the internal marina price list. Exception is made in ACI marinas Žut and Piškera where daily consumption of water is limited to 100 litres per boat and where boat washing is not permitted.

All ACI marinas supply water and electricity in accordance with technical capabilities. Restriction in supply of electricity or water is not a ground for price reduction.

### Prices:

This Price List contains separate tables for each ACI marina with daily, monthly and annual fees for mooring berths and land storage places and is applied in all ACI marinas. Prices are based on the vessel's length over all (L. o. a.). Exception is made in case of annual and semi-annual (winter season) berth prices,

where the price is determined by the vessel's length over all and the vessel's width.

Prices for boats over 25m in length are formed in a way that the difference in price between two last prominent lengths is divided by 5 and by that amount the prices for each boat's length are proportionally increased.

ACI reserves the right to check the reported dimensions of the vessel. In case the reported length of a boat does not comply with the measurement, ACI reserves the right to charge a different price based on a length (L. o. a.) and width obtained by the performed measurement..

### Catamarans and trimarans:

For multy-hulls all daily, monthly and annual berth and land storage fees are to be increased by 70%.

### Charter activity:

The annual berth rental fee for boats used for charter purposes will be increased by 20% in ACI marinas Trogir, Split, Dubrovnik, while in other ACI marinas the annual berth rental fee will be increased by 15%.

### By-boats (auxiliary boats):

Regardless of whether the by-boat (auxiliary boat) is registered or has a vignette signage, a berth fee is not charged when the auxiliary boat is berthed by the main boat. When the by-boat (auxiliary boat) uses the separate berth place, and the owner is holder of a yearly berth contract, the owner is obligated to sign a separate contract for the by-boat and the berth fee for a yearly, monthly or daily berth or storage on land is charged with a 50% discount. Signing the yearly contract for the by-boat does not entitle the owner to the separate ACI Card. When the by-boat (auxiliary boat) uses the separate berth place, and the main boat is not on a yearly berth contract with ACI, the valid price list for the daily berth is applied (no discounts allowed).
